IETE Project Proposal

Tech **stack used:**

Web Dev : HTML, CSS, Js, bootstrap

ML - A Machine learning model yet to be decided at a later point

Idea :

Implementation of full stack ML project

Method of implementation :

Implement an ml model.

design a website.

Link the model with the website using flask or Django

Deploy the website using Heroku.

Timeline:

Not yet finalized

Application of project:

To take in inputs and use them to get an accurate prediction which will be useful for the user.

Expected outcome:

Get a good understanding of machine learning and its uses

Develop a working ml model
